

## 12 years experiences in USB drives industry

Shenzhen Sino-Memory Electronics Co. Limited has been in the business of creating world-class consumer electronics since 2007. Our repertoire includes products such as USB Flash Drives, USB promotional items and a comprehensive range of computer peripherals. We specialize in combining unique, creative design ideas with these high quality products. Offering complete customization of 2D or 3D rubber USB flash drives and PVC USB flash drives, we enable our customers to make their mark in the marketplace with these appealing and attention grabbing, high utility gifts. Our products have a wide range of applications in education, police security, electronics, banking, business transportation, finance and telecom industries.

Our adherence to world-class quality management system ensures that every product from our line passes the H2 test and is fully compliant with UN standards. Our clients span the world and our products are used by businesses in Europe, USA and Asia. At present we are in the process of expanding our reach in the Middle East, Africa and Brazil. Among our clients are global names like Coca-Cola, Colgate and Intel, who have long standing partnerships with us. Backed by our product warranty, highly reasonable MOQ of 50, supported by impeccable customer care and served by our English-speaking foreign sales representatives, our business has grown by leaps and bounds without any geographical constraints.

Sino-Memory continues to remain committed to quality, customer service, innovation in design and timely fulfillment of projects. These are the strengths that have helped us carve our own niche in the highly competitive global marketplace of consumer electronics.

### Raw Material Preparation

Our factory will prepare all raw materials before hand to ensure mass production goes on wheels.

### Chips Test

We will adapt H2 software to test the capacity of every chip, eliminate the unqualified to prepare for the next stage.

### Outer Cases Logo Printing

We will adapt different crafts to print your brand logo on outer cases of different raw materials perfectly.

### Semi-Product Test

The PCB plate equipped with chip and USB interface will be tested by H2 software again to ensure the performance.

### Assembly

If the PCB plates perform well, they will be assembled together with outer cases to deliver a customized product.

### Final Product Test

After assembly, we will inspect the appearance, capacity, operation speed of all products completely before packaging.
